Database Project Phase I, ***Colin Peterson, Tytti Niemi, Mateo Rueda, Leevi Halén, Shradha Khanal***

Rate It Central Database

Requirements:

Rate it is an application for university communities sharing feedback: with the application students can rate professors.

The Rate It Central Database will keep track of Students, Sections, Courses, Professors, and Ratings.

Each Professors name is recorded and their unique ID.

Each Course the course name, year, a unique ID is recorded.

Each Section's term is recorded and has a unique ID.

Each Student has a password, unique email, and unique student username

Each Rating can have multiple traits, optional comments, a derived overall grade and unique ID.

Each Professor teaches one or many Sections, each Section is taught by one professor.

Each Section has none or many ratings. Each Rating is related to one Section.

Each Student creates none or many ratings. Each Rating is created by one student.

Each student belongs to one or many sections. Each section has a minimum of 10 students.
